

Terms of Use and Licensing for MasterFormat™

July 31, 2009

Since its inception in 1948, the Construction Specifications Institute (CSI) has focused on improving and organizing construction documents and communication within the construction industry. CSI's primary focus has been in the area of information classification and formats. The format documents (*MasterFormat™*, *UniFormat™*, *SectionFormat™*, and *PageFormat™*) and principles outlined in *The Project Resource Manual - CSI Manual of Practice* were developed by CSI members and have become industry standards followed by the North American building industry for organizing project manuals, product data, cost estimates, and for other construction related applications. CSI is committed to the maintenance and ongoing improvement of these standards to meet the changing needs of the construction industry; license fees help to support that effort and guarantee their continuing availability and usefulness.

Categories of Use

CSI endeavors to safeguard the efforts of its members and others who have contributed to the development of its documents and standards by protecting its intellectual property rights. To help do so and also promote the use of its formats and standards, CSI has established three categories of use for MasterFormat, with separate license terms for each:

- 1) Organization Internal Use/Individual Use
- 2) Public Use
- 3) Proprietary Use

These terms of use are outlined in detail below:

1) Organization Internal Use/Individual Use

- a) **Definition:** Use of MasterFormat for the purpose of organizing specifications or project manuals, drawing details, or cost estimates, communicating, filing, or organizing other construction project information, or for any internal or project-driven information applications within an organization or to facilitate communications between participants on construction projects, or by an individual user. Non-educational use by government agencies and universities that is not in an application provided to the general public in a way that generates revenue (*see* Proprietary Use) is considered Organizational Internal Use.
- b) **License Fee:** No fee
- c) CSI grants User a non-exclusive license for use contingent upon the following:
 - i) Intended use is for the transfer or storage of information or data organized and formatted using *MasterFormat*, either to others in connection with preparing construction documents or exchanging project information, or for purposes internal to an organization, subject to the following restrictions:
 - (1) Such transfer of data is not deemed by CSI to be "Proprietary Use" as defined below in this document, and
 - (2) The use does not compete with CSI's publication and distribution of *MasterFormat*, or with other CSI products.
 - ii) Use of *MasterFormat* numbers and titles on a network so that information so organized may be accessed by multiple computers within User's organization is permitted.
 - iii) Use of numbers and titles by product manufacturers or their representatives for marketing purposes is considered an Organizational Use (for example, affixing numbers and titles to product literature or providing a sample guide specification to a client), provided such use is limited to a small subset of the total available MasterFormat numbers and titles, and the

marketing efforts are not provided as a means of indexing or providing access to the products of multiple manufacturers.

- iv) The application of existing *MasterFormat* numbers and titles by the User shall not deviate from those published in *MasterFormat* or its official revisions on masterformat.com. User-added numbers shall be applied consistent with the *MasterFormat* Application Guide.

2) Public Use

- a) **Definition:** Public Use is the presentation or other use of *MasterFormat* for the purpose of education or training, in any format – live, recorded, web, or other – provided by a university or other non-profit institution without cost to attendees. Public Use licenses may also be granted for educational uses where the education is provided for a fee which does not exceed the costs of presenting the education.
- b) **License Fee:** No license fee will be required for Public Use of *MasterFormat*, but a letter or other written communication granting Public Use status must issue from CSI before a Public Use license will be valid.
- c) Any Public Use of *MasterFormat*, in whole or in part, shall include the following:
 - i) The format shall be identified as “*MasterFormat*™”
 - ii) The numbers and titles presented shall not deviate from those in the most current edition of *MasterFormat* at the time the license was put into effect.
 - iii) An acknowledgement (with active hyperlinks where possible) shall be provided as follows:

MasterFormat™ is produced jointly by The Construction Specifications Institute (CSI) and Construction Specifications Canada (CSC). U.S. copyright is held by CSI and Canadian copyright by CSC. All Rights Reserved. For more information on *MasterFormat* visit www.MasterFormat.com

CSI will provide the above acknowledgement and CSI logo to the user in a reproducible format.

3) Proprietary Use

- a) **Definition:** Proprietary (commercial) Use of *MasterFormat* is any presentation (including online and educational presentations), or sale of the numbers and titles, any derivation of the numbers and titles, or the application of the numbers and titles in a derivative product or resource that generates revenue. “Revenue” is not limited to direct financial gains, and may also include indirect gains that may accrue from such an application, such as providing a free service or application that helps to market or position an organization or individual by association. Proprietary Use does not include the use of *MasterFormat* for internal project communication in a commercial enterprise as described above under “Organization Internal Use/Individual Use” above, unless that use is marketed as an independent revenue-generating service or application. Use of *MasterFormat* by a third party to index or provide access to manufacturer product information, especially when such access is provided in return for listing or advertising fees, is a Proprietary Use. Use of *MasterFormat* for the purposes of organizing master guide specifications, design details, or cost information for the purposes of generating revenue through license, sale, or presentation to third parties is a Proprietary Use.
- b) **License Fee and Terms:** A license fee structure has been established for Proprietary Use of *MasterFormat*; the terms of each Proprietary Use agreement are established on a case-by-case basis. See separate document – “Proprietary Use of *MasterFormat*” for more specific details.
